

Go WILD

WiLD

Is easy!

With no software required, quick pairing at the press of a button, and intuitive controls for EQ, volume, and playback, WiLD delivers pro-quality audio with plug-and-play simplicity.

WiLD setups!

Each WiLD-TX transmitter supports up to 32 wireless receivers, allowing you to build custom setups with any combination of WiLD-14 receivers and WiLD-SB18 subwoofers.

WiLD is made to blend in.

Combining sleek design, professional-grade sound, and effortless installation on lighting rails.

Coverage is wild!

A single transmitter can wirelessly cover up to 17,000 m² of indoor surface, delivering audio across expansive spaces without a single audio cable.

WiLD-TX

WiLD-TX is the transmitter device that communicates with all the receiver devices to create a **WiLD** wireless network.

- Audio Inputs: Unbalanced RCA (Analog) & Bluetooth®
- 3-band EQ & Volume Control (front panel)
- MUTE port & REMOTE port for WPa-VOL
- Max 32 Receivers per Transmitter
- Line-of-sight range: up to 150m
- Quick Pairing Button (rear panel)

WiLD-14

WiLD-14 is a self-powered 4" lamp style loudspeaker with wireless audio reception under the control of the transmitter **WiLD-TX**, featuring an installation system which is compatible with ceiling light rails.

- Self-powered 4" loudspeaker
- Mounts to standard ceiling lighting tracks
- 40W RMS output
- 4" woofer + 0.75" tweeter
- Wireless reception (1880–1930 MHz, EU DECT, US DECT)

WiLD-SB18

WiLD-SB18 is a compact self-powered 8" subwoofer with wireless audio reception under the control of the transmitter.

- Self-powered 8" subwoofer
- 100W RMS output
- Wireless reception (1880–1930 MHz, EU DECT, US DECT)
- Compact design for discreet placement

**WiLD-14, WiLD-SB18
and WiLD-TX are
already available!**
